Calculating Times

Calculating Month in a Year

The Month in a Year is
The Sign that the Sun points to, Relative to Earth.

If at midnight, Virgo is directly overhead, than it's April 1st.

If at midnight, Sagittarius is directly overhead, than it's July 1st.

If at midnight, Pisces is directly overhead, than it's October 1st.

If at midnight, Gemini is directly overhead, than it's January 1st.

Since we cannot see the stars behind the sun,
We can see which sign is up at midnight,
And deduce that the sun is on the opposite sign.

Calculating an Age

How was an Age discovered ?
Every year, on March 21st, The 1st day of Spring,
Man observed the signs at the sky,
And discovered that the Zodiac Wheel
Is moving counterclockwise 1 degree every 72 years.

Calculating an Age -
Age is the time it takes the wheel to move over one sign.
A sign is 30 degrees, multiply that by 72 years,
Thus, an Age is 2,160 years.

How do i know the current age ?
The current age, is the sign that the Sun points to,
On March 21st.
Because the wheel is spinning counterclockwise,
We are at beginning of the Aquarius Age, and not pisces.

How did man know when it's 21st of March
If the signs are shifting ?
On March 21st,
The sun rises exactly over the Spring Equinox.

Calculating a Great Year

A Great Year is the time it takes the signs to move a Complete circle.
A Great Year is 12 Ages,
Thus, a Great Year is 25,920 years.

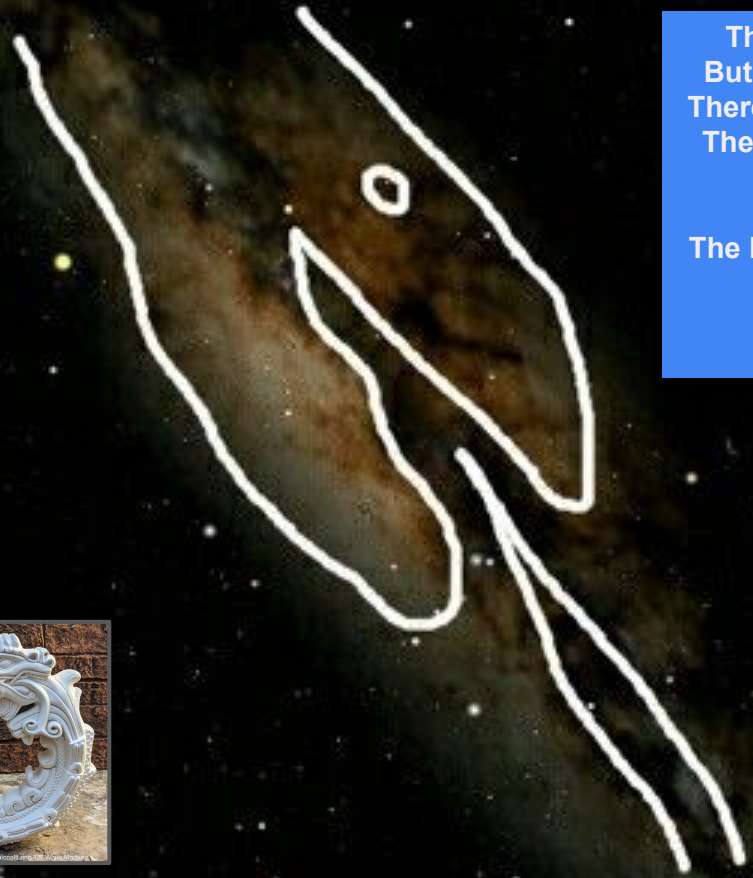
The Milky Way



The shape of the Milky Way system is a disk,
But it is at such an angle that it looks like a line.
Therefore, to explain that it is not a line but a disc,
The sages presented it as a snake eating its tail.

Location of the Milky Way

The Milky Way is mainly between the zodiac signs
Taurus and Gemini
And between the zodiac signs
Scorpio and Sagittarius

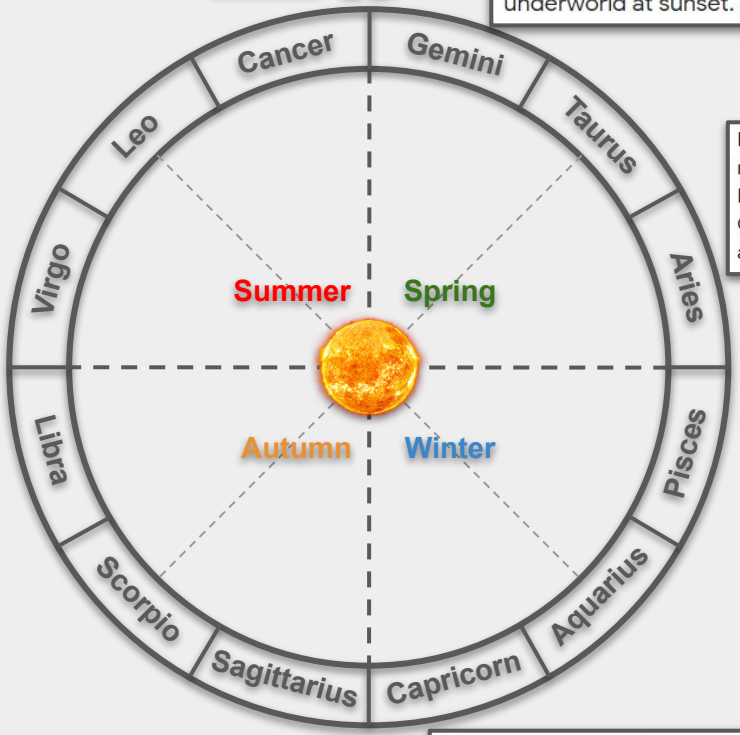
Ancient Egypt's View of the Zodiac

by Manly P. Hall

Ra

Noon
Summer
Heavens

Ra is the Egyptian word for 'sun'. As a solar deity, Ra embodied the power of the sun but was also thought to be the sun itself, envisioned as the great god riding in his barge across the heavens throughout the day and descending into the underworld at sunset. 20 May 2021



Horus was an important falcon figure in ancient Egyptian mythology and a cosmic deity. He is the son of Osiris and Isis. He is locked in battle with Set, his uncle, who killed Horus' father, Osiris. Osiris ruled as the first pharaoh of a unified Egypt during a time of great agricultural and societal success.

Horus

Morning
Sun-rise

Seth

Evening
Sun-set

Seth (Set), son of Geb (Earth) and Nut (sky), brother of Osiris, was god of the desert, foreign lands, thunderstorms, eclipses, and earthquakes. Seth was a powerful and often frightening deity, however he was also a patron god of the pharaohs, particularly Ramses the Great.

Osiris

Night
Winter
Underworld

Osiris, one of Egypt's most important deities, was god of the underworld. He also symbolized death, resurrection, and the cycle of Nile floods that Egypt relied on for agricultural fertility. According to the myth, Osiris was a king of Egypt who was murdered and dismembered by his brother Seth.
